

SCREEN UNITS

World class expertise in the design of effective training solutions

Providing multi-section screens for panoramic and 180-degree training systems

Manufacture a range of live-fire screen units designed specifically for use with PRISim® judgmental training simulators and our MMTS white light training system

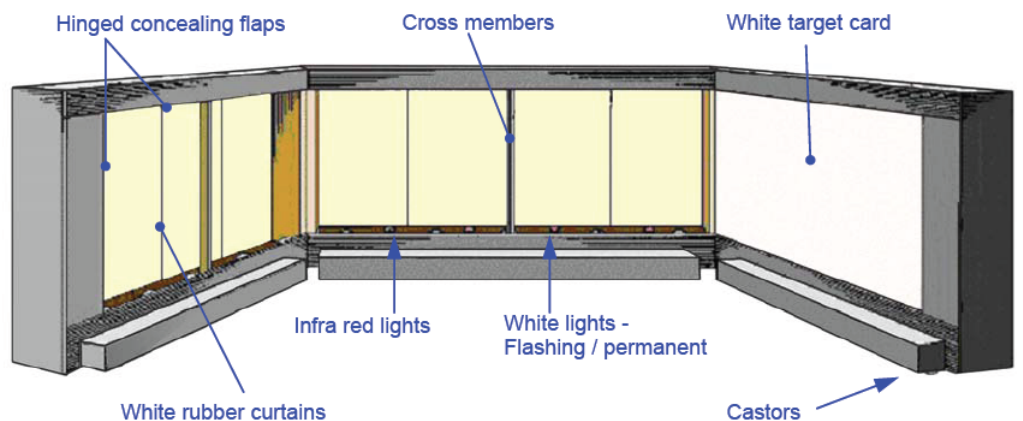

LIVE-FIRE TARGET SCREENS

Our screen units are designed for indoor use with our live-fire training systems. They may also be used with laser-based systems and training ammunition.

Screen units are available in 3 standard sizes—2400, 3500 and 4500—we also manufacture screens to custom sizes, depending on your requirements. We produce a specialist foil-reinforced high-brightness paper. Each screen unit is supplied with two rolls of paper. Each roll is 50 metres in length.

We can supply our screens with 'patch out' card instead of paper. We keep a large range of replacement facings in stock.

In addition to our 'flat' screens, we also manufacture a range of panoramic and 180° screens. The two flanking screen sections can be positioned to provide a wrap-around view for 180° training systems, or they can be folded flat to give a larger panoramic screen for shooting at static targets with multiple firers shooting in their own lanes.

SCREEN UNITS

PAPER DRIVE AND CONTROL BOX

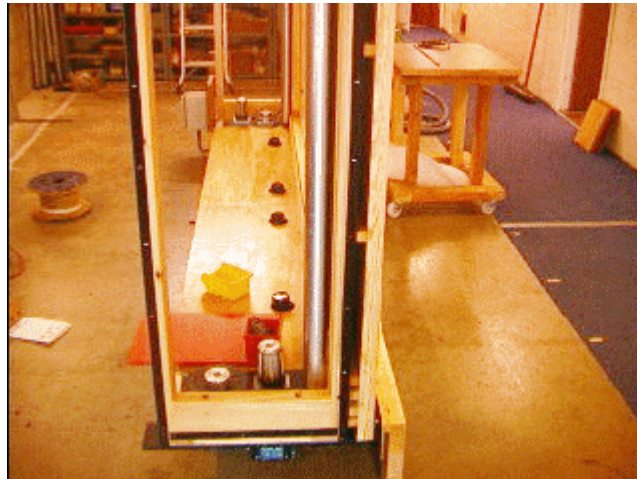

Our screen units are manufactured in the United Kingdom and come with DC control for lights and the paper drive mechanism. Computer-based control of the lights and paper motors via an RS-232 connection is available as an option.

Lights and fittings can be either tungsten, infrared, or fluorescent, or any combination of these three. Our screen units are normally built to operate from 220/240-volts mains power. We can provide 110/120-volts versions on request.

REPLACEMENT PAPER, CARD AND RUBBER CURTAINS

We keep in stock replacement materials for your screen. The foil-reinforced high-brightness paper rolls are available 'ex-stock' in 1,830mm, 1,880mm and 2,235mm widths. Each roll of paper is 50 metres long.

Replacement 'patch-out' card and white rubber curtains are also available.
